

# RE&UP joins ITMF, advances circular tech in textiles

*FW*

RE&UP Recycling Technologies, an innovator in circular technology, is revolutionizing textile recycling with its Next-Gen Cotton and Polyester, which deliver virgin fiber performance with sustainable benefits. The company recently won the ITMF Start-up Award 2024 at the ITMF Annual Conference in Samarkand, Uzbekistan, underscoring its impact on sustainable textile solutions.

As RE&UP becomes a corporate member of the International Textile Manufacturers Federation (ITMF), ITMF Director General Christian Schindler highlighted the collaboration's significance, noting the importance of RE&UP's recycling technology for industry-wide circularity goals.

RE&UP's General Manager, Andreas Dorner, emphasized the benefits of ITMF membership, including access to valuable global industry data and connections across the textile value chain. This partnership strengthens RE&UP's mission to drive sustainability and scale circular practices within the global textile sector.
