

Switzerland's Heberlein Technology has joined the ITMF

TECHNICAL TEXTILES TODAY

Heberlein Technology, which was established in 1835, is a top supplier of air texturing and interlacing jets for synthetic continuous filament yarns worldwide. The creation and manufacturing of extremely specialized essential components for process-optimized handling and completion of synthetic yarns, particularly filaments.

ITMF Director General Mr. Christian Schindler said, “ITMF is pleased to welcome Heberlein Technology as a corporate member of ITMF.” The fact that members of ITMF come from many facets of the whole textile value chain, including textile manufacturers of equipment and parts. Heberlein’s proficiency with air texturing and interlacing Synthetic continuous filament yarn jets will increase and fortify ITMF’s membership base. and proficiency. Conversely, entry to further textile value chain sectors will be advantageous for Heberlein Technology.

“Joining ITMF means access to very informative statistics, survey, and reports that help to better understand the dynamics of the industry as well as access to a unique international network,” stated **Mr. Martin Zürcher, CEO of Heberlein Technologies**. ITMF Conferences provide insightful information and the chance to connect with influential industry delegates from every link in the textile value chain.
