INTERNATIONALE VEREINIGUNG DER TEXTILINDUSTRIE

INTERNATIONAL COTTON INDUSTRY STATISTICS

International Textile Industry Statistics (formerly called International Cotton Industry Statistics)* presents data on the productive capacity (spindles, rotors, air-jets, shuttle and shuttle-less looms) and raw materials consumption (cotton and man-made fibres) in the short-staple organized (spinning mill-) sector of the textile industries in virtually all textile-producing countries in the world. The information in this report is based on data collected from national textile associations and other publicly available sources.

Each of the three main sections in the publication (spinning capacities, weaving capacities, raw materials consumption) begins with a graphical illustration of the most salient features of some of the data contained in the subsequent detailed tables.

The geographical grouping of countries is based on continents. For Europe and the Americas, a further division has been made according to regions.

Table of contents

Spinning Machinery

Graphs

- 4 Summary
- 6 Installed Short-Staple Spindles
- 7 Installed OE-Rotors
- 8 Installed Air-Jet Spindles

Tables: Installed Machinery

- 9 Summary
- 10 Africa
- 11 The Americas
- 12 Asia & Oceania
- 13 Europe

Weaving Machinery

Graphs

- 14 Summary
- 15 Installed Shuttle-less Looms
- 16 Installed Shuttle Looms

Tables: Installed Machinery

- 17 Summary
- 18 Africa
- 19 The Americas
- 20 Asia & Oceania
- 21 Europe

Raw Materials Consumption

Graphs

- 22 Summary
- 23 Raw Cotton
- 24 Cellulosic Staple Fibres
- 25 Synthetic Staple Fibres

Tables: Raw Materials Consumption

- 26 Summary
- 27 Africa
- 28 The Americas
- 29 Asia & Oceania
- 30 Europe

Spinning Machinery
